

Task 4: UI Clone Challenge — Netflix India

Candidate Name	Danish Qureshi
Candidate ID	BS/REG/119497
Role	Frontend Developer Intern
Task	Task 4 — UI Clone Challenge (Netflix India)
Submission Date	May 2026

Objective

Recreate the UI of a popular website as closely as possible using only HTML5, CSS3, and vanilla JavaScript. The chosen website is the Netflix India landing page — a complex, multi-section UI with hero background, feature sections, accordion FAQ, email signup, and a complete footer.

Technologies Used

Technology	Purpose
HTML5	Page structure and semantic markup
CSS3	Styling, dark theme, responsive layout, animations
JavaScript	FAQ accordion toggle functionality
Vercel	Deployment and hosting

Sections Cloned

- Navbar — Netflix logo, language selector, Sign In button
- Hero section — full-page background with movie thumbnails grid, headline, email signup
- Feature 1 — Enjoy on your TV (with device image)
- Feature 2 — Download your shows to watch offline
- Feature 3 — Watch everywhere (multi-device)
- Feature 4 — Create profile for children
- FAQ section — accordion with 6 questions (JavaScript toggle)
- Footer — 4-column links grid, language selector, Netflix India branding

Mobile — Hero & TV Feature

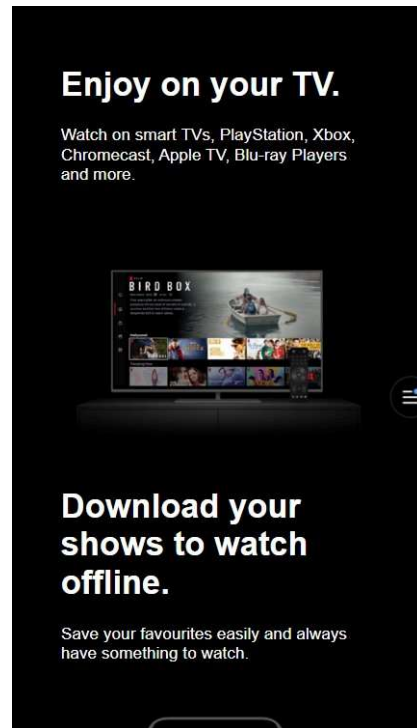

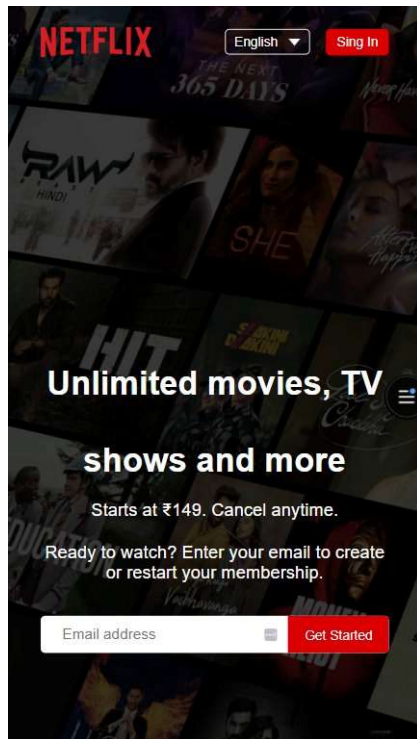

Figure 5 & 6: Mobile hero section and TV feature — stacked single-column layout

Mobile — FAQ & Footer

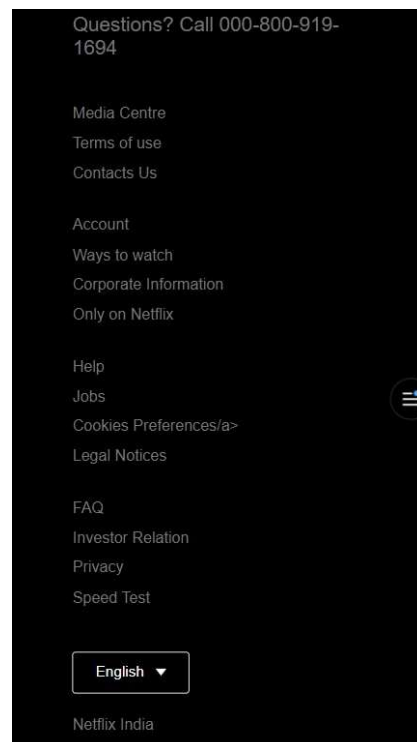

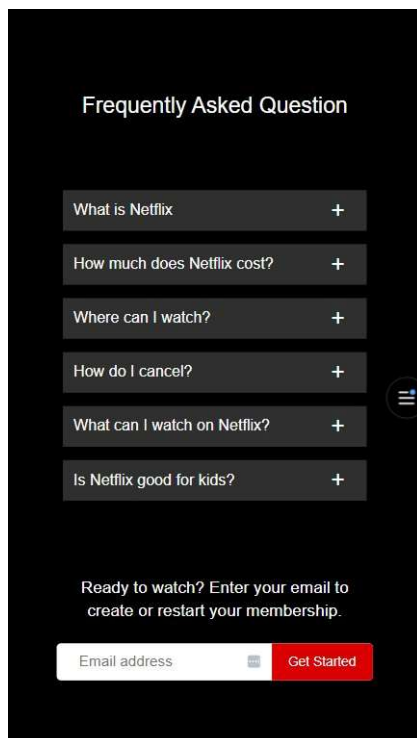

Figure 7 & 8: Mobile FAQ accordion and footer — fully responsive on small screens

Implementation Summary

The Netflix India clone accurately replicates the original landing page layout using HTML5 and CSS3. The dark-themed design uses a black background (#000) with white and red (#E50914) as accent colors matching Netflix branding. The hero section uses a CSS grid of movie thumbnail images with an overlay. The FAQ section uses JavaScript event listeners for accordion toggle. The layout is fully responsive — on mobile, multi-column sections stack vertically and font sizes adjust appropriately. The project is deployed live on Vercel.
